DAVIT MUJIRISHVILI

QA ENGINEER | PLAYWRIGHT | PYTHON | LINUX | BACKEND TESTING

Georgia   **heyitsdavit@gmail.com**   **Linkedin**   **GitHub**   **Website**

PROFESSIONAL SUMMARY

Results-driven Software QA Engineer with 4+ years of experience testing Nasdaq-powered trading systems. Strong in backend testing, API validation, FIX/FIXML, Python automation, Linux environments, and Playwright, where I write and maintain test cases using a POM-based structure. Most of my work is on data-heavy, high-risk systems where mistakes are expensive and specs matter. If you want a QA who takes ownership of stability and quality instead of just closing tickets, I'm that person.

WORK EXPERIENCE

Middle QA Engineer | 2022 – Present

Exactpro | Remote

- Identified and reported 200+ backend and UI defects, including 30+ critical issues, directly improving release stability.
- Built 10+ Python and Bash utilities to automate repetitive QA tasks, reducing repetitive manual checks by about 30%.
- Executed, monitored, and analyzed 200+ automated smoke and regression pipelines, shortening feedback time on failed builds and regressions.
- Actively validated FIX/FIXML (financial API) and backend message flows against specifications, catching protocol and data inconsistencies before they reached higher environments.
- Delivered 4 client-facing demos and 10+ internal demos to present system functionality and testing results to stakeholders and team members.
- Projects: LedgerEdge (UK), Nasdaq Tadawul (Saudi Stock Exchange), Nasdaq SGX (Singapore Exchange), Nasdaq ASX (Australia Stock Exchange).

Owner of E-commerce store | 2018-2022

Self employed | Tbilisi

- Ran day-to-day operations of a small e-commerce store, including product sourcing, listings, pricing, and order processing.
- Built and maintained the store website using HTML and CSS, handling updates and content changes.
- Worked with SQL and Excel for product data, orders, and basic reporting.
- Managed advertising activities and prepared visuals using Photoshop.
- Handled customer support, returns, and issue resolution, keeping store operations stable.

Product Researcher | Dropshipping | 2017-2018

LTD Aleph | Tbilisi

- Researched and validated products for dropshipping using marketplace data, trends, and competitor analysis.
- Analyzed pricing, demand, and competition to shortlist products with acceptable margins and sales potential.
- Prepared product listings and descriptions and coordinated with the store owner on catalog updates.
- Worked with Excel and basic SQL queries to track product performance and research results.

SIDE PROJECTS

Own Resume Website

Built and maintain a personal resume website using Django with custom HTML and CSS. Implemented multiple sections (projects, skills, experience, contacts) and handle deployment, updates, and content changes. Use it as a live platform to showcase projects and testing work.

Website: https://davit-resume.com

File Organizer

Developed a local Python utility to automatically organize files by type and rules, with logging and CSV tracking of operations. Focused on reliability, traceability of actions, and safe handling of file moves and renames.

GitHub: https://github.com/comatosemaster/file_organizer

Recipe Suggestor

Created a Python desktop GUI application that uses the YouTube API to suggest recipes based on user input. Implemented search, filtering, and basic UI flow to explore and open recipe videos directly from the app.
